ADEBOYEJO DAVID

REACT FRONT END DEVELOPER

I am a diligent young engineer with basic knowledge & enthusiasm for technology. I'm a dependable web developer with a keen eye for designing responsive User Interfaces that depletes accurate information in an orderly Manner. I also have diverse set of skills ranging from HTML DOM structuring, PHP, CSS 3 styling, Super CSS, and all the way to coding dynamically in JavaScript. I take SEO optimization into consideration when developing a project either locally or remotely. So I hope I achieve the best results for employers that would be interested in getting in touch with me.

EXPERIENCE

LIRS Lagos State Internal Revenue Service

- I worked as an intern in a co operate firm, providing I.T support in their day to day developments, hardware troubleshooting, software development and basic Network structuring.
- I developed a web based, project tracking system for my team's assessment displaying each project's progress graphically on a canvas.

COMMUNICATION

RYLA Rotary Youth Leadership Awards

- I was a steadfast team leader amongst groups in training on an Island, learning amazing communication skills, public speaking and how to be a great team player by establishing good relationships.
- Excelled in Interpersonal communication and teamwork, actively listening and Coordinating activities
