

ADEBOYEJO DAVID

REACT FRONT END DEVELOPER

I am a diligent young engineer with basic knowledge & enthusiasm for technology. I'm a dependable web developer with a keen eye for designing responsive User Interfaces that depletes accurate information in an orderly Manner. I also have diverse set of skills ranging from HTML DOM structuring, PHP, CSS 3 styling, Super CSS, and all the way to coding dynamically in JavaScript. I take SEO optimization into consideration when developing a project either locally or remotely. So I hope I achieve the best results for employers that would be interested in getting in touch with me.
