Experienced front-end developer with four (4+) years proficiency in JavaScript, object-oriented technologies and user optimized interactions. I am a meticulous developer dedicated to crafting clean, high-quality code with team collaboration in mind. Additionally I possess a strong problem solving mindset with the ability to learn new software and technologies quickly whilst addressing intricate bugs within a component-based software architecture. I am committed to evolving my skill-set and expertise in pursuit of excellence.

WORK EXPERIENCE

SENIOR FRONT-END DEVELOPER

LIRS (LAGOS STATE INTERNAL REVENUE SERVICE HQ - REVENUE HOUSE) | 2023 - DATE

- Customized Shopify products' template using liquid code, enabling users to enhance product appearance and elevate overall traffic by 10%.
- Participated in a Hackerton that required we redesigned the Shopify dashboard and this improved my website accessibility skills by providing alt-readers for visually impaired users.

JUNIOR FULL STACK DEVELOPER

VYBZTECH (PERSONAL PROJECTS) | 2022 - DATE

- Conducted a design flow research for a Mining website, thus implementing a responsive website approach with SEO in consideration.
- Integrated Firebase, a BAAS to an authenticated URL that gives access to alter the data of a photo-gallery web project.
- Created over ten (10+) typed-based reusable components in a Photographer portfolio project practicing Server-side rendering (SSR) in the Next JS Framework.
- Completed a Project Management certificate program through a two-week course at an online university.
- Wrote reusable components to recreate the Netflix website, testing my quick-debugging skills whilst ensuring code quality control in React. Thereby increasing my coding skills by 15% efficiency rate.

FRONT-END DEVELOPER

PFS (PRECISE FINANCIAL SYSTEMS) | 2021 - 2022

- Partnered with back-end developers and styled dynamic web pages generated using crystal reports, resulting in website accessibility increase by 15%.
- Improved my knowledge about the React Ecosystem perusing topics like React query, React Redux, Router, Hooks, Custom hooks, Vite, React testing library, Flux, providers, context API, API consumption using axios and Razor pages etc.
- Enhanced my interpersonal and communication skills for easy collaboration with teams.
- Utilized my latent React JS skills to redesign their data management portal into suitable reusable components.

IT SUPPORT INTERN

LIRS (LAGOS STATE INTERNAL REVENUE SERVICE HQ - GOOD SHEPHERD) | 2019- 2020

- Built three (3) demo projects utilizing SCSS, JQuery and other responsive design libraries prior to discovering React.
- Led a team of four (4) members to rearchitect a graphical representation of employee worksheet data employing open sourced libraries and performing CRUD operations along with PHP. This served as my project in 3rd level.
- Digested in-depth JavaScript tutorials to understanding the weird parts of the Programming language.
- Created a Report-form survey with JavaScript validations, with the aid of JQuery decreasing my work rate by 25%.
- Acquired comprehensive front-end expertise through mastery of HTML, CSS, Bootstrap and JavaScript.
