PROFESSIONAL SUMMARY

Senior Frontend Engineer with 4+ years architecting and scaling enterprise web applications for government agencies and fintech platforms. Specialized in building performant React/Next.js systems serving 50K+ concurrent users. Proven expertise in component architecture, state management, and full-stack integration. Demonstrated impact: improved system performance by 35%, reduced development cycles by 40% through component library architecture, and scaled teams through mentoring. AWS/GCP deployment, CI/CD automation, and accessibility compliance (WCAG AAA) expertise. Track record of turning complex engineering challenges into business wins.

PROFESSIONAL EXPERIENCE

Technical Lead, Frontend | LIRS (Lagos Internal Revenue Service HQ) | 2022 - Present

Impact: Architected and shipped mission-critical applications serving 500+ government auditors; improved operational efficiency by 30% through real-time data synchronization.

- Architected enterprise Next.js application with server-side rendering, reducing initial page load from 4.2s to 0.8s (81% improvement); implemented for government web portal serving 50K+ monthly audits
- Designed and shipped reusable React component library across 5+ internal projects, reducing feature delivery time by 40% (~240 dev hours/year saved); achieved 95%+ component test coverage with Jest & React Testing Library
- Led full-stack integration of Flask backend with Next.js frontend using WebSocket real-time synchronization; reduced audit report latency from 6 minutes to <2 seconds, enabling live data validation
- Optimized SEO and accessibility to WCAG AAA standards (accessibility score 95+), increasing organic traffic by 20% and expanding agency reach to 8K+ new users quarterly
- Mentored 2 junior developers on React fundamentals, TypeScript best practices, and modern architectural patterns; both developers promoted within 18 months
- Implemented responsive design framework supporting Chrome, Safari, Firefox, Edge; reduced cross-browser support tickets by 15%, lowering support burden by ~30 hours monthly

Tech Stack: Next.js, React 18, TypeScript, Tailwind CSS, Supabase PostgreSQL, REST APIs, WebSockets, Jest, Vercel

Frontend Developer (Remote) | PFS - Precise Financial Systems HQ | 2021 - 2022

Impact: Integrated complex reporting system into web platform; increased audit accessibility by 15%.

- Integrated Crystal Reports engine into React dashboard, enabling 200+ government auditors to generate custom reports without backend support; reduced IT ticket backlog by 18%
- Built secure authentication system using JWT + .NET Razor Pages backend; ensured zero security incidents across 150K transactions/month
- Conducted code reviews for 3 team members, establishing patterns that reduced QA bug reports by 22%; mentored team on RESTful API design principles
- Translated UI/UX wireframes into responsive React components with Tailwind CSS + styled-components; maintained 98%+ design-to-code fidelity.

Tech Stack: React, TypeScript, .NET, Razor Pages, JWT, Tailwind CSS, REST APIs, Postman

Developer Foundation - IT Support | LIRS (Lagos Internal Revenue Service) | 2020 - 2021

Impact: Built foundational skills in full-stack development; delivered 4 live projects and side projects.

- Led 4-member team to build employee worksheet tool using PHP backend (CRUD operations) + jQuery frontend; reduced manual payroll processing time by 25% (~10 hours/month per user)
- Translated 15+ UI/UX wireframes from Adobe XD + Figma into responsive code using React, jQuery, JavaScript; maintained pixel-perfect accuracy with Material UI component library
- Implemented design system patterns across live project + 3 side projects; established reusable SCSS/SASS architecture reducing stylesheet duplication by 40%
- Contributed expertise in code standards and W3C compliance; conducted 20+ code reviews and performance audits

Tech Stack: PHP, React, jQuery, JavaScript ES6+, SCSS/SASS, Material UI, Firebase, Node.js, NPM

KEY PROJECT

AGENCY FILE MONITORING SYSTEM (FileFlow)

Problem

Government agency needed real-time visibility into 10K+ daily file operations, report generation, movement tracking, and audit compliance; legacy system had 6-hour reporting lag and zero accountability built on old infrastruture.

Solution

Architected and built enterprise React + Flask intranet application with real-time file action tracking, role-based access control, comprehensive audit trail and report generation.

Key Features

- Real-time physical file tracking with action timestamp verification and complete audit trail.
- File upload/download with version control and rollback capability
- Granular activity audit trail capturing all user actions (1.2M events/month)
- Role-based access control (Admin, Manager, Staff, View-Only) with permission inheritance
- Interactive dashboard with real-time data visualization (Chart.js)

Impact

- Reduced audit time from 6 hours and physical monitoring to <10 minutes and therefore 80%+ efficiency gained.
- 100% accountability tracking with enabled permission to control the flow of information and therefore revenue.
- Adopted across 7 governmental department - 100+ daily active users

Tech: React JS, TypeScript, Python Flask, MySQL, Tailwind CSS, Chart.js, Docker, Windows Server

TECHNICAL SKILLS

Frontend Development

- Frameworks: Next.js, React JS, Vite, React Native
- Languages: TypeScript, JavaScript (ES6+), CSS3, SCSS/SASS, Php
- State Management: Redux Toolkit, Context API, Zustand
- UI Libraries: Tailwind CSS, Material UI, shadcn/ui, Radix UI
- Testing: Jest, React Testing Library, Vitest, Postman
- Design: Figma, Framer, Claude Design, Gemini Flash, Adobe XD, Tailwind CSS, Styled Components

Backend Engineering

- Tools: Node.js, Express.js, Flask, RESTful APIs, ASP.NET basics
- Deployment: Vercel, Netlify, Render, Environment management (dev, staging, production), Docker basics
- CI/CD: Git/GitHub, GitHub Actions, Azure DevOps basics
- Database: Supabase, Firebase, PostgreSQL, MongoDB
- Security: Authentication, SSL/TLS, SessionStorage

Project Management & AI Tools

- Management: Agile/Scrum, Notion, Google Workspace, Zoom, Microsoft Suite
- AI APIs: OpenAI GPT-4, Claude (Anthropic), Hugging Face
- Automation: Python scripting, UiPath RPA, N8N workflows
- Data Processing: Pandas, Axios, RESTful API integration, data transformation pipelines
- Team Development: Mentoring, code review leadership, best practices documentation

EDUCATION

BACHELORS IN ELECTRONIC & COMPUTER ENGINEERING

Lagos State University (LASU EPE) - Second Class Upper Division Honors

COMPLETED COURSE IN CISCO NETWORKING ACADEMY - DIGITAL COMMUNICATIONS

Federal Government College Ijanikin Lagos - Senior school certificate (WAEC, NECO)

CERTIFICATIONS

Project Management Principles and Practices

University of California, Irvine. Margaret Maloni MBA PMP Instructor

Foundations of Project Management

Google Project management specialization

React Basics
